EDUCATION

MIT AOE

Bachelor of Technology in Electronic and telecommunication

Pune, Maharashtra

Sep. 2023 - Present

PILLAI Junior College

Class 12th in Mathematics, Physics, and Chemistry (MPC)

Panvel, Maharashtra

Aug. 2021 - Apr. 2023

EXPERIENCE

Machine Learning Intern — SmartBridge

Frost Solutions

Hyderabad, Telangana

Oct. 2024 - Dec 2024

- Built and deployed **4 ML models** in Python for **motor temperature prediction**, improving prediction accuracy by **18%**.
- Engineered **features from sensor data** (current, voltage, RPM, ambient temperature) and automated preprocessing pipelines.
- Implemented **automated hyperparameter tuning**, cutting model training time from **3 hours** → **45 minutes**.

PROJECTS

AI Resume Analyzer | Django, LangChain, HuggingFace, SQLite, REST API, React

- Engineered a secure Django REST backend for PDF upload, text extraction, and AI-driven evaluation pipelines, reducing processing latency by **30%**
- Built an AI inference workflow using LangChain + HuggingFace models for ATS scoring, skill matching, and content evaluation..
- Implemented PDF parsing, cleaning, and preprocessing modules improving model accuracy by **15%**. Utilized SQLite for structured storage of analysis logs and user interactions, ensuring traceability and debugging support.
- Integrated robust logging, error handling, and environment-based configuration for production-grade backend reliability
- Stored analysis logs and user queries in SQLite with efficient indexing for fast lookup and debugging.

MERN Food Application | MERN Stack (MongoDB, Express.js, React.js, [Node.js](#), Docker)

- Developed a full-stack food recipe and video-sharing platform using the MERN stack.
- Implemented user authentication (JWT-based login for Food Partners) and role-based access control.
- Built video upload and streaming functionality with ImageKit integration for optimized media delivery.
- Designed responsive UI in React with modular components and reusable layouts.
- Containerized the app using Docker and Docker Compose, enabling one-command deployment.
- Managed backend APIs with Express.js and MongoDB for food item CRUD, likes, and saves.
- Debugged authentication and API errors during integration to ensure seamless end-to-end functionality

ATLAS: Academic Task & Learning Agent System | Python, LangChain, LangGraph, Streamlit, FASTAPI, FAISS, Notion API

- Engineered an agentic AI system automating academic workflows like research analysis, scheduling, and note management through intelligent task orchestration.
- Designed a multi-agent architecture (using LangChain & LangGraph) for dynamic coordination between agents such as Web Researcher, PDF Analyzer, Task Planner, and Academic Advisor.
- Implemented RAG for contextual question answering on PDFs, utilizing FAISS and Hugging Face embeddings, and integrated Notion API for note management and scheduling with voice interaction via Deepgram and gTTS.
- Leveraged Cerebras LLM for efficient inference (with OpenAI fallback), and built an interactive Streamlit interface supporting both text and voice-based conversations

TECHNICAL SKILLS

Languages: Java, Python, C/C++, SQL, JavaScript, HTML, CSS

Frameworks & Libraries: Firebase, React, Node.js, Express.js, Django, FastAPI, REST APIs, Authentication, Authorization, LangChain, LangGraph, , Streamlit, Microservices, Docker (MCP Toolkit), Scikit-learn, Pandas, NumPy, Matplotlib, Hugging Face, TensorFlow (basic),

Databases: PostgreSQL, MongoDB, MySQL

Tools & Methodologies: Git, GitHub, VS Code, Visual Studio, RESTful APIs, Docker, CI/CD).

ACTIVITIES

CODECHEF (MITAOE)-member

oct 2025 -

- Managed event logistics, promotions, and participant experience as part of the core committee.

Certifications

- OCI AI Foundations Associate (2025)** – Oracle Cloud Infrastructure

ACHIEVEMENTS AND AWARDS

WeMakeDev Hackathon (Meta & Cerebras) – Ranked in the **Top 20 out of 500+ projects** for developing a **Voice Agent** using **Docker MCP Toolkit** and **fine-tuning LLaMA**, demonstrating strong AI integration and system design skills.

Data Structures & Algorithms:

Solved 50+ problems on LeetCode (Arrays, Strings, Trees, DP) | 50-day streak
